

## Community Partners Wound Care Initiative

This is a program designed to make access to, and provide information about, high quality and effective wound care products to people being seen by their primary care healthcare professional.

The initiative was instigated by Bill Chadwick (Coloplast) who identified various obstructive factors which could lead to intensive and prolonged care needed for wound therapy.

Yurek Specialties already works with the South West Community Care Access Centre (CCAC) which gives us access to advanced wound care products with our partners at Coloplast, Acelyty, 3M, DermaScience and others. The program is not a replacement for CCAC care but to complement it – both pre and post CCAC needs - and also designed to help the clients who do not want to have to be available for nursing visits/clinics or require a product not available on the extensive CCAC formulary and the client is willing to purchase the required items. Most items are available in smaller quantities rather than by the box.

Delivery to depots throughout the South West CCAC area will be free of charge. Orders over \$25 can be delivered to homes in London free of charge. The client will receive a receipt detailing their name and address as well as detailed information on the product supplied – ideal for extended benefits or tax returns.

A simple order form to be completed by the physician, nurse practitioner or nurse can be given to the client to bring to the store, or it can be faxed or emailed to Yurek Specialties. Items are usually available within 48 hours. Yurek will contact the customer on receipt of the order to obtain credit card details for payment. If you have any questions or require any further information please feel free to contact Ceri Anderson at 519-963-1142 or email [canderson@yurekpharmacy.com](mailto:canderson@yurekpharmacy.com)
