

Answer Key: Wound Healing Physiology Chutes and Ladders

1. True
2. False
3. Superficial, primary intention, delayed primary intention, partial thickness wound healing, and full thickness/secondary intention healing
4. E
5. True
6. Inflammation (or inflammation and hemostasis), proliferation, remodeling (or maturation)
7. False
8. F
9. 1, 2, 3, 4
10. 80%
11. False
12. Intrinsic, iatrogenic
13. C
14. False
15. C
16. A, C, D
17. E
18. C
19. True
20. Local ischemia (inappropriate application of compression, smoking), inappropriate wound care (misuse of antiseptics, skin tears and blisters from tape, wound desiccation or over hydration, frequent dressing changes), trauma, wound extent and duration
